

# HAI Founding Members Program

Creates \$1,155,000 Annual Wallet  
Membership duration: 3 years

**\$1,155K wallet**

A \$5M annual membership gives access to a \$1,155,000 customizable yearly fund to seed and support customized research and engagement activities across Stanford that are aligned with our members' AI and ML priorities.

The wallet can be used toward the following:

## Research: Collaborate with HAI

### Research Collaborations:

Members collaborate with Stanford faculty and researchers on projects that are aligned with their biggest R&D challenges and allow for a range of measurable outcomes.

### Visiting Scholars/ Industry Members:

Experienced researchers from member companies join with a Stanford faculty member to study and engage in research project(s) under their direction.

### FMA:

A Stanford PhD student (Fellow) works closely with an expert (Mentor) from a member company to conduct advanced research under the guidance of a Stanford faculty (Advisor).

## Student Engagement & Recruitment:

Founding Members enhance their company's visibility across campus.

## Additional Benefits: For Our Members

- Access to Executive Breakfast Seminars and the HAI Startup Series
- Membership in the Stanford Digital Economy Lab and the Stanford Artificial Intelligence Lab
- Semi-annual member meetings and access to exclusive HAI events with faculty, students and industry

“

The HAI Founding Members Program allows for customizable, project-based collaborations that engage participating Googlers with new topics, methods, and people in the domain of Human-Centered AI. We look forward to expanding on these initiatives — Google recognizes that HAI's interdisciplinary perspective is key to shaping an inclusive AI future.

”

Jeff Dean, Chief Scientist, Google DeepMind and Google Research

“

As the HAI Industry Program has matured over the last couple of years, we find increased opportunities for our researchers to engage with faculty and students to advance areas critical to the future of AI. In addition to the benefits of engaging across a broad community on technology, ethics, and policy, we are also beginning to see specific advances in AI techniques and approaches that are of mutual interest.

”

Jeffrey J. Welser, COO IBM Research, VP Exploratory Science & University Collaboration, IBM

“

The Stanford HAI Industry Program is specifically designed to engage companies with the Stanford AI community of faculty, students, and experts to explore the unique problems and challenges that these companies or industries face.

”

Fei-Fei Li, Sequoia Professor, Computer Science Department; Denning Co-Director, Stanford HAI

“

The HAI Industry Program continues to be a great enabler for us to engage with the broader ecosystem across research and industry adjacencies. The insights and value we derive from it have helped us tune our new to market offerings and reach a better product market fit.

”

Chintan Mehta, CIO, Head of Digital Technology and Innovation, Wells Fargo
